

# OTTOSTUMM W40 FIRE

system for internal & external doors and partitions (no thermal break)

Colin's Sash Windows

Delivered Nationwide, Trade and Retail

OVER 50,000 WINDOWS SUPPLIED SINCE 2014

## SYSTEM DESCRIPTION

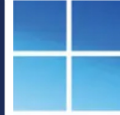

Steel is the ideal material for the realization of fire doors, thanks to its structural stability in the event of a fire. Combined with the correct fire-rated glass, it guarantees a secure barrier against fire and smoke.

FerroFinestra W40 Fire – with fire protection classes from E30 to E120 and from EW30 to EW120 – offers a wide range of possibilities for finely dividing residential, commercial and institutional buildings into safe fire protection sectors.

Keeping the original manufacturing method of hot-rolling, FerroFinestra W40 Fire has an evocative and elegant design that meets the highest architectural demands, both for renovation works and contemporary buildings.

Fire out, beauty in.

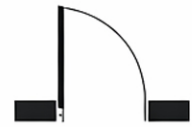

DISCOVER THE POSSIBILITIES OF OTTOSTUMM W40 SYSTEM

## HINGED DOOR

- available in single or double door version
- the possibility to add a top panel/fan light and side panels
- possible in any configuration

## FIXED PANELS

- combined with a door or as a separate element

## IMPORTANT:

We can also manufacture sliding, pocket, bifold and pivot doors using the Ottostumm W40 Fire profiles; however, these configurations have not been tested or certified as complete fire-rated systems.

They are based on certified profiles and certified glass, but the system provider has not tested these solutions as a complete assembly for fire resistance.

This type of solution is possible, but it must be strictly approved by the fire inspector or building control.

We can also manufacture our Premium Frame with fire-rated glass; however, only the glass is certified, and the frame has not been tested or certified as part of a complete fire-rated system.

Such solutions may be accepted in certain cases; final approval is always subject to the inspector's decision.

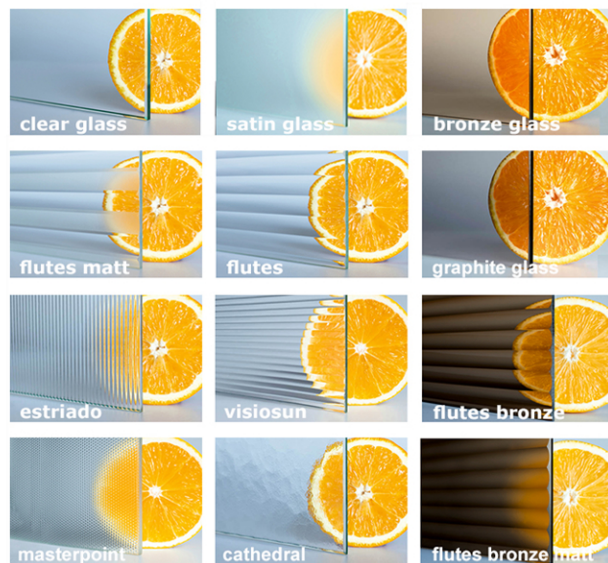

**CUSTOMISATION & FINISH OPTIONS**

The Ottostumm W40 FIRE doors offer a wide range of customisation options to suit any interior style. Doors can be finished in any colour from the RAL palette, as well as specialist powder coating palettes such as Tiger and Interpon.

We also offer a wide selection of glass types, including clear, frosted, reeded, tinted and decorative glass.

Please see the example photos for inspiration and available design options

wide range of color options

**HARDWARE OPTIONS**

In the Ottostumm W40 FIRE system, the doors can be equipped with lever handles, pull handles, various locking options such as thumbturn or key locks, and door closers if required. We offer several pull handle options within our standard range at no additional cost. Other lever handles and pull handles can be selected from our hardware catalogues.
