

OTTOSTUMM W40

system for internal & external doors
and partitions (no thermal break)

Colin's Sash Windows
Delivered Nationwide, Trade and Retail

OVER 50,000 WINDOWS SUPPLIED SINCE 2014

SYSTEM DESCRIPTION

The Ottostumm W40 system is a high-quality solution designed for both heritage restoration and contemporary architecture. It is an evolution of the original W20 system, combining classic aesthetics with improved performance and modern glazing capabilities.

Manufactured from hot-rolled steel profiles, W40 is defined by its slim sightlines and elegant proportions, making it ideal for projects requiring a refined "steel-look" appearance. The increased profile depth allows for double glazing up to 27 mm, enhancing thermal and acoustic performance.

W40 is a non-thermally broken system, best suited for internal applications or external use in mild climates.

The system supports a wide range of configurations, including doors, partitions, and fixed glazing.
